ICARO SOFTWARE [www.icaro.com](http://www.icaro.com)

---

## 1. License conditions

You can find the currently valid license conditions in the document READ ME – SOFTWARE LICENSE in your Download section.

## 2. Download Center

The purchaser or his agent obtains access to electronic folders which contain, among other things, the acquired contract software and license file(s).

- The folder **BAPI Handler Setups** contains all the programs necessary for a complete installation of the software. **Version 5 is currently valid.** Version 4 is no longer being developed further or even maintained, whereas Version 3 is only updated by ICARO SOFTWARE by its own free will sporadically and on a non-binding basis. The corresponding SAP programs for the Versions 3 and 4 are no longer being maintained by SAP!
- The folder **BAPI Handler Patches** contains selected software programs which replace the corresponding software programs in **existing** installations.

## 3. Version and License

This license allows you to use the current version at the time of acquisition. In no case does this license allow the use of newer license versions; unless either the purchaser or his agent obtains a currently valid maintenance contract with ICARO SOFTWARE, or ICARO SOFTWARE corrects errors within the scope of the legal warranty. In such a case a new license is usually issued.

## **4. Maintenance Contract**

The purchaser is only entitled to use the current versions of the software under contract, provided he obtains a valid maintenance contract with ICARO Software.

Please contact us via [info@icaro.com](mailto:info@icaro.com) , if you are not sure whether you have the appropriate software version for your license.
